

## The Marine Group – Watchet Marina Renovation Programme 2021

## Harbour Management – Dredging

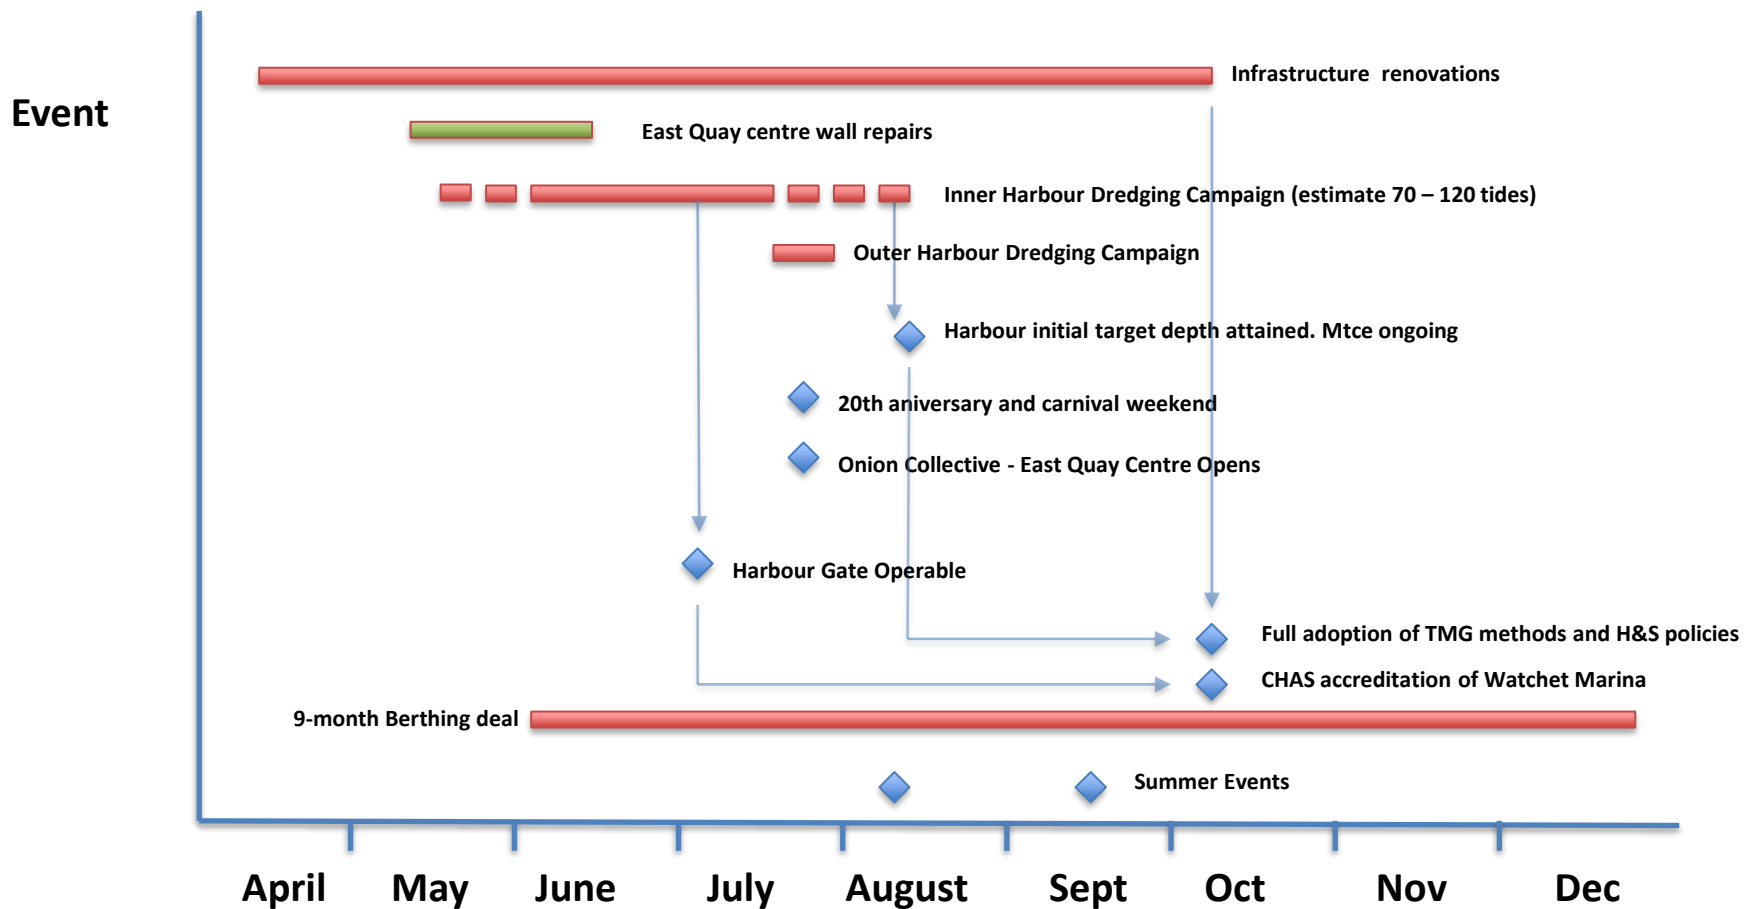

# Harbour Management – Equipment

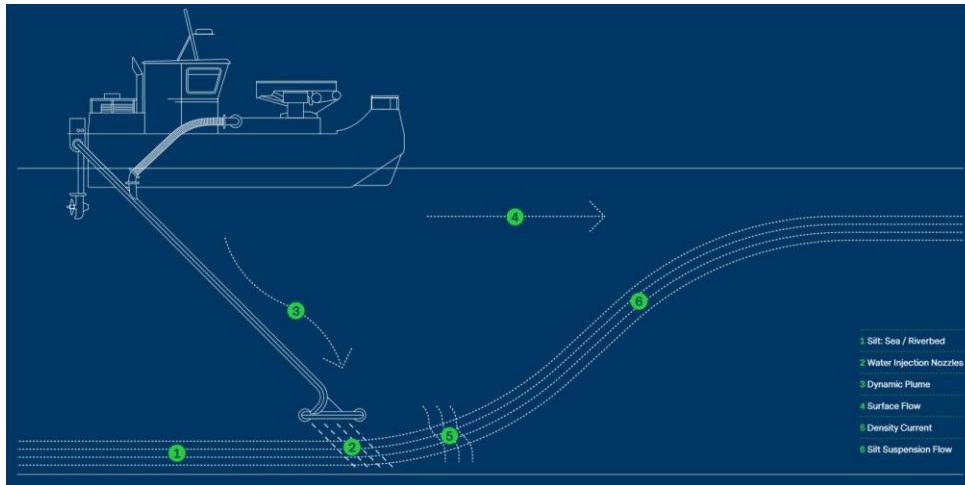

- CMS Seaka – Very high power and high volume for open spaces
- CMS Innovation – high power but agile to work at close quarters around and under marina infrastructure

## Harbour Management – 2021 Works Programme

## About The Dredging Campaign

- Dredging Start subject to detailed programming
- Dredging to operate for two tides per day
- Estimate is 70 – 120 tides depending upon sediment properties to remove average of 2 metres of mud within the inner harbour (initial target)
- Initial works likely to be with CMS Innovation
- Target depths forecast to be achieved in summer but is subject to performance of works
- Volume of sediment will accelerate as the programme advances
